

CampusConnect – Software Engineering Team

Analysis & Design Phase Task Allocation

Team Member 1(Gig) – Requirements Analyst & Project Coordinator

Role

Requirements Analysis and Project Coordination

Responsibilities

- Analyze the project requirements.
- Define the project scope.
- Prepare the Software Requirements Specification (SRS).
- Gather functional requirements.
- Gather non-functional requirements.
- Write user stories.
- Develop detailed use case descriptions.
- Coordinate with the Digital Marketing team to collect user requirements and customer insights.
- Organize and document meetings during the analysis phase.

Deliverables

- Software Requirements Specification (SRS)
- Functional Requirements Document
- Non-Functional Requirements Document
- User Stories
- Use Case Descriptions
- Project Scope Document
- Requirement Traceability Matrix

Team Member 2(Arrey) – System Analyst & Software Designer

Role

System Analysis and Architecture Design

Responsibilities

- Design the overall system architecture.
- Identify all system modules.
- Define system workflows.
- Produce UML diagrams.
- Design software components.
- Review technical feasibility.

UML Diagrams to Produce

- Use Case Diagram
- Activity Diagram
- Sequence Diagram
- Class Diagram

Deliverables

- System Architecture Diagram
- UML Documentation
- System Workflow Documentation
- Module Breakdown

Team Member 3 (Fon Ronic)– UI/UX Designer

Role

User Experience Design

Responsibilities

- Conduct user experience planning.
- Design user flows.
- Create information architecture.
- Produce low-fidelity wireframes.
- Design navigation structure.
- Ensure usability and accessibility.

Pages to Design (Wireframes)

- Home Page

- Login Page
- Registration Page
- Marketplace
- Product Details
- Sell Item
- Services Page
- Internship Page
- Events Page
- User Profile
- Dashboard
- Settings

Deliverables

- User Flow Diagram
- Information Architecture
- Navigation Flow
- Low-Fidelity Wireframes
- UX Design Documentation

Team Member 4 (Didiartech)– UI Designer

Role

User Interface Design

Responsibilities

- Convert approved wireframes into high-fidelity designs.
- Create the application's visual identity.
- Design reusable UI components.
- Maintain design consistency.
- Prepare responsive desktop and mobile layouts.

High-Fidelity Screens

- Landing Page

- Login
- Register
- Marketplace
- Product Details
- Sell Item
- Skills & Services
- Internship Section
- Campus Events
- User Profile
- Dashboard
- Settings

Deliverables

- High-Fidelity UI Mockups
- Responsive Designs
- Design System
- Color Palette
- Typography Guide
- Icon Library
- UI Components

Team Member 5(Siela Lucien) – Database Designer & Technical Documentation

Role

Database Design and Technical Documentation

Responsibilities

- Identify system entities.
- Design database relationships.
- Create ER diagrams.
- Define primary and foreign keys.

- Prepare database schema.
- Create a data dictionary.
- Assist with API planning.
- Prepare installation documentation.

Deliverables

- ER Diagram
- Database Schema
- Data Dictionary
- Initial API Documentation
- Installation Guide
- Technical Documentation

Team Collaboration Workflow

Step 1

Requirements Analysis

- Gather client requirements.
- Define project scope.
- Create user stories.

Responsible:

Team Member 1

Step 2

System Design

- Design architecture.
- Create UML diagrams.
- Define system modules.

Responsible:

Team Member 2

Step 3

User Experience Design

- Design user flows.
- Create wireframes.
- Plan navigation.

Responsible:

Team Member 3

Step 4

User Interface Design

- Design high-fidelity interfaces.
- Create design system.
- Build responsive layouts.

Responsible:

Team Member 4

Step 5

Database Design

- Create ER Diagram.
- Design database schema.
- Prepare technical documentation.

Responsible:

Team Member 5

Responsible:

Team Member 5

Final Deliverables for the Analysis & Design Phase

Analysis Documents

- Software Requirements Specification (SRS)
- Functional Requirements

- Non-Functional Requirements
- User Stories
- Use Case Descriptions
- Project Scope

System Design

- System Architecture Diagram
- Use Case Diagram
- Activity Diagram
- Sequence Diagram
- Class Diagram
- UI/UX Design
- User Flow Diagram
- Information Architecture
- Navigation Flow
- Low-Fidelity Wireframes
- High-Fidelity UI Mockups
- Responsive Designs
- Design System
- Color Palette
- Typography Guide
- UI Components

Database Design

- ER Diagram
- Database Schema
- Data Dictionary
